

VIJAYASANKAR A

FULL STACK DEVELOPER

+91 9597169646 | vijayasankar9646@gmail.com | India | [LinkedIn](#)

CAREER SUMMARY

Full Stack Developer with 2+ years of experience designing and developing scalable web applications. Experienced in building high-performance frontend interfaces and robust backend services using modern frameworks and APIs. Strong focus on clean architecture, performance optimization, and delivering maintainable, production-ready systems.

EDUCATION AND CERTIFICATION

B.E. Mechanical Engineering | Karpagam College of Engineering, Coimbatore

2019 - 2023

TECHNICAL SKILLS

Frontend – HTML, CSS, JavaScript, TypeScript, React JS, Angular, Bootstrap, Tailwind CSS

Backend – Java, Spring boot, Node JS, Express JS.

Database – MySQL, PostgreSQL, MongoDB.

Tools – Git, AWS, Docker, Postman.

WORK EXPERIENCE

Full Stack Developer | Shinelogics Informatics

2023- Present

- Contributed to the development and enhancement of large-scale enterprise web applications used across multiple business domains.
- Designed and maintained backend services using Java and Spring Boot, ensuring secure and scalable API architecture.
- Developed responsive and high-performance frontend interfaces using modern JavaScript frameworks.
- Collaborated with cross-functional teams including product managers, designers, and QA engineers to deliver complex features on schedule.
- Optimized database queries and application workflows to improve performance and system reliability.

KEY CONTRIBUTIONS

EMS — Employee Management System

[Software Solutions Sector]

- Developed a responsive UI using component-based architecture to improve usability and maintainability.
- Built secure RESTful APIs with validation layers and structured error handling.
- Implemented role-based access control (RBAC) to manage permissions across multiple user roles.
- Optimized database queries to maintain fast response times with large operational datasets.

Agri-Tech ERP & POS System

[Retail / Fresh Produce Sector]

- Developed a multi-module enterprise system integrating a customer web application, administrative dashboard, and POS platform to streamline retail operations and inventory management
- Built complex management modules using Angular for administrative and operational workflows.
- Developed a responsive React.js customer-facing application with centralized state management using Context API.

- Implemented backend services using Java integrated with MongoDB for real-time inventory and pricing synchronization.
- Designed high-performance RESTful APIs to enable seamless communication between client, admin, and POS systems.

ERP — Enterprise Resource Planning

[Manufacturing Sector]

- Developed modular UI components with reusable architecture to support multiple operational modules.
- Integrated data from different operational units into centralized dashboards for better decision-making.
- Improved application performance using lazy loading and optimized bundle strategies, reducing load times significantly.

AWARDS

Unwavering Perseverance Award — 2024

Recognized for exceptional dedication, consistent performance, and commitment to delivering high-quality results.
